- (1) Station and generalized skews must be between -2.00 and +3.00 in this spreadsheet.
- (2) Considering the relatively short length of most gage records, less frequent peak estimates need to be used with considerable care.
- (3) Computed one of four ways (see "generalized skew coefficient" worksheet): Mean and variance (standard deviation²) of station skews coefficients in region; skew isolines drawn on a map or regions; skew prediction equations; read from Plate 1 of Bulletin 17B (reproduced in this spreadsheet), with MSE Generalized Skew = 0.302.
- (4) Results are automatically rounded to three significant figures, the dominant number of significant figures in the K-Value table.
- (5) Historic frequency analysis assumes that intervening years reflect systematic record.

 MSE Generalized Skew⁽³⁾: 0.3020
 A: -0.313388
 B: 0.886010
 station skew: -0.207653
 MSE Station Skew: 0.12106695
 Weighted skew coefficient⁽¹⁾: -0.1482273

Recurrence Interval ⁽²⁾ (years)	Percent Chance	K-Value	Ln(Q)	Peak ⁽⁴⁾ Discharge (cfs)	90% Confidence Interval	
					Upper (cfs)	Lower (cfs)
200	0.5	2.437	9.6604	15,700	24,100	11,400
100	1	2.216	9.4912	13,200	19,800	9,810
50	2	1.973	9.3047	11,000	15,900	8,320
25	4	1.699	9.0937	8,900	12,400	6,900
10	10	1.264	8.7601	6,370	8,430	5,100
5	20	0.848	8.4404	4,630	5,870	3,800
2	50	0.025	7.8083	2,460	2,960	2,050
1.25	80	-0.833	7.1496	1,270	1,550	1,010

- (1) Station and generalized skews must be between -2.00 and +3.00 in this spreadsheet.
- (2) Considering the relatively short length of most gage records, less frequent peak estimates need to be used with considerable care.
- (3) Computed one of four ways (see "generalized skew coefficient" worksheet): Mean and variance (standard deviation²) of station skews coefficients in region; skew isolines drawn on a map or regions; skew prediction equations; read from Plate 1 of Bulletin 17B (reproduced in this spreadsheet), with MSE Generalized Skew = 0.302.
- (4) Results are automatically rounded to three significant figures, the dominant number of significant figures in the K-Value table.
- (5) Historic frequency analysis assumes that intervening years reflect systematic record.
